

Newsletter n° 3

Association for the promotion and the development of joint international programmes in higher education **ProDeJIP**

Promote your competencies!

Even though joint international programmes (JIPs) have been developed for quite some time now, they still need advocacy. ProDeJIP gives a voice to those who believe and have invested in JIPs, it promotes the competencies of its members, but it also accompanies those interested in the creation of new JIPs.

Because setting up and running a JIP is still a challenge, the Association works towards creating a friendlier environment for them by coordinating or participating in projects aimed at facilitating JIPs' preparation, promotion, management and sustainability.

The promotion of its members' competences and the networking activities of the Association now enter a new phase with the creation of ProDeJIP's new website. So there are more and more reasons to join the Association and participate in its activities.

If you want to find out more about us, come and meet us in person on the occasion of the next networking conference organized by the EACEA in Brussels, 29-30 June 2016.

Hoping to see you there or elsewhere!

Boas EREZ
President of ProDeJIP

ProDeJIP now has a **new web site**, see

www.prodejip.com

So far we have organized networking events and training sessions, we have monitored tools and services available to JIPs and we have advocated JIPs in various ways. We will of course continue with these activities, but the new web site will allow us to improve the promotion of our members' competencies in the field of JIPs, be they individuals or institutions. It will also help increase internal discussion among members of the Association through its restricted area, and thus help create synergies among members.

On the web site, you will find the **presentations delivered at the 2nd Annual Conference in Leiden** last February, as well as the archives of the previous meetings organized by the Association.

The **3rd Annual Conference** is planned to take place **in Evora, Portugal, in early 2017.**

ProDeJIP will participate in the **Networking Conference "Mastering joint excellence under Erasmus Mundus"**, organized by the Education, Audiovisual and Culture Executive Agency, to be held in Brussels, 29-30 June 2016. This conference will bring together some 300 coordinators of the past and present courses organized under Erasmus Mundus. The Association will be present in Brussels starting Tuesday the 28th, so do not hesitate to make contact with us if you are interested in learning more about it.
